## Contents:

---

<b>1</b>	<b>hydroengine package</b>	<b>1</b>
1.1	Submodules . . . . .	1
1.2	hydroengine.RRmodel module . . . . .	1
1.3	hydroengine.aux_models module . . . . .	1
1.4	hydroengine.hydroengine module . . . . .	1
1.5	hydroengine.rrmodels module . . . . .	1
1.6	Module contents . . . . .	1
<b>2</b>	<b>utils package</b>	<b>3</b>
2.1	Submodules . . . . .	3
2.2	utils.DataCollectionNWKN module . . . . .	3
2.3	utils.DataCollectionThredds module . . . . .	3
2.4	utils.utilsRaster module . . . . .	3
2.5	utils.utilsVector module . . . . .	3
2.6	utils.utilsOutputs module . . . . .	3
2.7	Module contents . . . . .	3
<b>3</b>	<b>hydrovehicle package</b>	<b>5</b>
3.1	Submodules . . . . .	5
3.2	hydrovehicle.hydrovehicle module . . . . .	5
3.3	Module contents . . . . .	5
<b>4</b>	<b>Usage example</b>	<b>7</b>
<b>5</b>	<b>Indices and tables</b>	<b>9</b>

# CHAPTER 1

---

hydroengine package

---

## 1.1 Submodules

### 1.2 hydroengine.RRmodel module

### 1.3 hydroengine.aux\_models module

### 1.4 hydroengine.hydroengine module

### 1.5 hydroengine.rrmodels module

## 1.6 Module contents

# CHAPTER 2

---

utils package

---

## 2.1 Submodules

### 2.2 utils.DataCollectionNWKN module

### 2.3 utils.DataCollectionThredds module

### 2.4 utils.utilsRaster module

### 2.5 utils.utilsVector module

### 2.6 utils.utilsOutputs module

### 2.7 Module contents

# CHAPTER 3

---

hydrovehicle package

---

## 3.1 Submodules

## 3.2 hydrovehicle.hydrovehicle module

## 3.3 Module contents

# CHAPTER 4

---

## Usage example

---

1. open a terminal and `cd` to the example directory
2. Retrieve climate data from Idaho's Metdata Thredds server from Sept 1, 2012 to August 31, 2013:

```
dataCollectionThredds.py -ds 2012-09-01 -de 2013-08-31 -a precip --flip ↵
↪vectorFile Domain_latlong.shp
dataCollectionThredds.py -ds 2012-09-01 -de 2013-08-31 -a tempmax --flip ↵
↪vectorFile Domain_latlong.shp
dataCollectionThredds.py -ds 2012-09-01 -de 2013-08-31 -a tempmin --flip ↵
↪vectorFile Domain_latlong.shp
```

3. Write default parameters for the HBV model and the Muskingum routing model on the basin shapefiles:

```
writeVectorModelParameters.py -subBasinsVectorFile subs1.shp -subBasinOutFile ↵
↪subsout.shp
-streamVectorFile riv1.shp -streamOutFile rivout.shp
```

4. Write default parameters for the raster components of the rainfall runoff model:

```
writeRasterModelParameters.py precip_F2012-09-01_T2013-08-31.nc
```

5. Run hydrologic model:

```
hydrovehicle.py 08/31/2016 precip_F2012-09-01_T2013-08-31.nc tempmin_F2012-09-01_ ↵
↪T2013-08-31.nc
tempmax_F2012-09-01_T2013-08-31.nc param_files_test.json rivout.shp subsout.shp
```

# CHAPTER 5

---
